

World Leaders in Oil Testing

Regular sampling, testing and analysis of fuel, lubricant and hydraulic oil enables engineers to accurately measure, monitor and assess the condition and efficacy of their machinery over time. This allows adjustments to be made to ensure maximum operational performance. Kittiwake designs, manufactures and supplies a full range of fuel and lube test kits, equipment and sampling products for industrial and marine use, enabling engineers to successfully manage crucial maintenance routines.

Kittiwake products are available worldwide through our network of technical distributors and agents.
